The NHS **Workforce Disability Equality Standard** was introduced in 2019 and is designed to improve the workplace experience and career opportunities for Disabled people working or seeking employment in the NHS.

The WDES is a series of evidence-based metrics that provide us with a snapshot of the experiences of our Disabled colleagues.

By providing comparative data between Disabled and Non-Disabled staff, this information can be used to understand where key differences lie and will provide the basis for the development of action plans, enabling us to track progress year on year.

**Metric 2**

Relative likelihood of non-disabled staff compared to Disabled staff being appointed from shortlisting across all posts.

**Metric 3**

Relative likelihood of Disabled staff compared to non-disabled staff entering the formal capability process, as measured by entry into the formal capability procedure.

**Metric 4**

a) Percentage of Disabled staff compared to non-disabled staff experiencing harassment, bullying or abuse from:

- i) Patients, their relatives or other members of the public
- ii) Managers
- iii) Other colleagues

1

**Electronic Staff Record**

Disclosure rates for disability have increased with 8.8% of staff declaring a disability. The disability status of 9.7% of the workforce is unknown, down by 1.5% from the previous year.

2

Staff are requested to review their data every 6 months on the ESR (Electronic Staff Record), so is dependable on the individual logging in to update their details.

3

Also, the disability status may change in the course of employment, therefore, fully accurate data even for those declaring (as disabled or non-disabled) is unlikely.

4

**Staff Survey**

Disclosure rates for disability are higher in the staff survey with 27.6% of staff declaring a disability. The disability status of 1.8% of the workforce remains unknown.
